

North Crescent Primary School

Guiding Explorers of the Future

Wow! Another term done full of lots of learning and fun! We would like to take the opportunity to say thank you for all your support this term. As well as a big thank you to our staff for all their hard work.

We wish you a Merry Christmas and a Happy New Year. See you back in January.

Diary Dates

Monday 6th January -
First Day Back

Notices

We are proud to announce our new website is now live!

Visit <https://www.northcrescent.org/> to keep up to date with everything going on and all the exciting things we do at North Crescent Primary.

Reminder

Admissions for September 2025 Reception Class opened on Monday 4th November and will close on Wednesday 15th January. Apply at www.essex.gov.uk/admissions

For parents of our budding explorers, if your child will be of the age to start Primary School in September, you will still need to apply for a place at North Crescent as children will not automatically be enrolled.

Book of the Week

'Holes' by
Louis Sachar

Stanley Yelnats was given a choice. The judge said, "You may go to jail, or you may go to Camp Green Lake." Stanley was from a poor family. He had never been to camp before.

Stanley Yelnats' family has always had bad luck; the fault of a curse put on his no good dirty rotten pig-stealing great great grandfather. So, when he's found guilty of a crime he didn't commit and sent to a boot camp in the sweltering desert, Stanley isn't surprised. The evil warden of the camp claims that digging a hole each day is the way to turn a bad boy into a good boy. Every day, Stanley must toil in the blazing sun and dig his own hole. But is that all there is to it – or must Stanley dig up the truth?

Year 5 have been reading this novel in class, but it is a great story for Years 4 - 6. *Holes* is full of lifelike characters and mystery, which unravels throughout the book. A fantastic story for reluctant readers!

Huge congratulations to the following children who have been chosen as the Lead Learners for the whole Autumn Term!

Pathfinders 1	Taliah & Alejandro	Pathfinders 2	Amelia & Ethan
Adventurers 3	Luchi & Jake	Adventurers 4	Eleanor & Henry
Navigators 5	Miami & Elijah	Navigators 6	Violet & Jack

Each week we celebrate the class that have shown respect for their classroom. The children really love our gold, diamante dustpan and brush award! Why don't you ask them about it?

It has been a week of celebrations. On Tuesday we had our lead learners' celebrations assembly. Fourteen children from across the key stages were presented with the prestigious lead learners' certificate. This was followed by our attendance assembly on Thursday. It was amazing to see how many children have not had a day off school since September. Well done everyone!

10 Top Tips for Parents and Educators

SAFETY ON SOCIAL MEDIA

Currently, children are growing up in an immediate and throwaway culture when it comes to content that's consumed online. So much material is now deliberately created to be shorter in nature – and may often contain hidden elements such as advertising, or extreme political and cultural views. With complex algorithms built to keep people on their phones and engaging with social media content, it's becoming increasingly difficult to reduce time spent on these platforms.

1 REDUCE DOOMSCROLLING

It's concerning how common it is for young people to spend hours 'doomscrolling': trawling through social media and aimlessly viewing every post they see, many of which might make them feel sad or anxious. Social media can be useful for keeping in touch with friends and family, as well as staying up to date on current events. However, it's important to use it with a clear purpose, instead of endlessly scrolling through content, which could lead to young people accidentally discovering harmful material.

2 TALK ABOUT THE CONTENT

It's important to keep apprised of the kind of content that a young person is being exposed to. Discussing what they're watching online can help you understand why they're using social media in the first place. Furthermore, ensure that children are aware of hidden content, such as advertising of a product – and that they know how to spot that the creator is being paid to talk about it.

3 FIND POSITIVE ASPECTS

Despite all the concerns, there's plenty of wholesome content on social media. It's worth spending time with children to help them find something suitable and enjoyable. Perhaps you'll even discover a joint interest, and you can enjoy the content alongside the child. As part of this, you should also point out why certain things shouldn't be given attention, explaining why it isn't suitable and why it's been created in the first place.

4 REDUCE SCREENTIME

Young people can sometimes be unaware of the exact amount of time they spend looking at social media. Smart phones don't just have the capacity to monitor screentime; they also record how much time is spent on each app. Consider setting targets to reduce this and support children to meet these goals, gradually reducing the amount of time spent on different apps.

5 FILL THE VOID

Monitoring and reducing screentime can create a lot of free time to fill, and young people can even face withdrawal symptoms when made to step away from their phones. To mitigate this, consider what offline activities you could introduce the child to, and what they would enjoy. This can ensure that young users will permanently cut down on their screentime, rather than temporarily doing so while they know it's being monitored.

6 REDUCE NOTIFICATIONS

One way in which social media platforms keep people coming back is through notifications. The algorithms behind these apps track people's daily habits, including the times of the day where they're most likely to engage with the platform. This data is then used to deliver specifically timed notifications to draw them back in. To avoid young users being exposed to this tactic, simply turn off notifications for the app in their phone's settings.

7 LIVE IN THE REAL WORLD

Overexposure to social media can distort someone's perception of the real world – from body norms to social conventions. This filtered environment can make it hard for young people to distinguish reality from online content, which is now becoming even more difficult with the rise of AI. To mitigate this concern, take time to teach young people how to discern truth from fiction, both on and off social media.

8 DIGITAL DETOX

Encouraging young people to take a 'digital detox', from even just a couple of the apps that they use, can result in an overall reduction of screentime and less exposure to potentially harmful content. Alternatively, rather than avoiding the app entirely, encourage children to take a 'digital detox' from content creators and influencers, and instead, keep in touch with friends and family – which is generally a far healthier use of these platforms.

9 MODEL GOOD BEHAVIOUR

Consider the habits that you're demonstrating to your children. How much time do you spend on your phone? How much do you 'doomscroll'? Comparing your own usage with the child's could put things into perspective for them – or if it turns out that you're also overusing social media, it can turn screentime reduction into a joint mission, which you and the child can work on together.

10 BE CLEAR ON THE "WHY"

Research shows that young people can become addicted to social media. There are many schools that are moving towards being 'phone free' due to the negative impacts of using social media and phones continuously. It's important to explain to young people why managing screentime is important. Set out the benefits and ensure they have all the relevant information, so it's not just seen as a punishment.

What Parents & Educators Need to Know about MENTAL HEALTH & WELLBEING APPS

WHAT ARE THE RISKS?

When looking at options for supporting a child's mental health, the sheer volume can be overwhelming. There are many wellbeing apps available, but unfortunately not all are trustworthy. It's important to evaluate which resources are suitable, reliable and effective. This guide lets you know what to consider before installing such an app, to determine just how useful it's going to be.

QUALITY & RELIABILITY

Mental health apps can be a useful starting point when looking for wellbeing advice and strategies and can be a useful extension to the in-person services available. However, they aren't a substitute. Information on the quality of some of these apps is scarce. They may look cute and child-friendly, but have they been designed by a mental health professional? Furthermore, do they have research to back up their content?

PLACE RESPONSIBILITY ON CHILDREN

Some apps add the words 'kids' or 'children' to their title or use cartoon icons to make them more appealing to young people. When signing up for some of these apps, some will speak to the parent directly, saying something along the lines of "Your child is good to go. Let them take it from here". It's important to remain involved in the child's mental health journey, so regular check-ins are recommended.

DISREGARDING APPROPRIATE SUPPORT

Young people who feel anxious and have trouble sleeping may download a mindfulness app to help. While this is a good strategy initially, it's not addressing the root of the problem. A child could simply try managing these symptoms themselves (as opposed to speaking out and seeking professional help), which could potentially worsen their anxiety in the long run.

LACK OF PERSONALISATION

Mental health or wellbeing apps are useful tools for the short term, teaching users several helpful habits to manage their condition – such as keeping an illness diary, improving nutrition and practising mindfulness exercises. As every person is unique – and children especially will grow and develop in different ways – these apps struggle to tailor themselves to users' individual needs. For example, many apps don't distinguish between the ages of users and can offer extremely generic advice.

DATA SECURITY

As with any other app – not just those for mental health and wellbeing – it's wise to check out the privacy policy before downloading it. Some of these applications may share data with third parties for numerous reasons (such as targeted advertisements), and if a user is sharing personal and sensitive information within the app, they probably don't want it ending up elsewhere without their consent.

IN-APP PURCHASES

Many apps will provide their most basic features for free but will require you to pay for other aspects – such as a more tailored experience or access to additional resources. This could be a one-off fee or a regular subscription. Consider whether this is actually required. Is it benefiting the child, or could they receive the same support from a medical professional?

Advice for Parents & Educators

CHECK THE CREDIBILITY OF THE APP

Before you download a mental health and wellbeing app, investigate the developers. Have they consulted with qualified mental health professionals to create their resource? Also check whether the app is affiliated with any government or mental health organisations, as these are solid indicators of legitimacy. Reviews can also be a useful signpost to the app's quality. There are many good apps out there, but there are just as many that miss the mark.

READ THE PRIVACY POLICY

Look into the app's terms of service – especially its privacy policy. Do so by yourself first, then go over it with the child who is considering using the app, to ensure they know what data will be collected and how exactly it will be used. Use all of this information to make an educated decision on whether or not to download that particular app.

SEEK PROFESSIONAL SUPPORT

Trusted mental health and wellbeing apps designed by qualified, reputable organisations can be used alongside the personalised advice and support of fully trained professionals. These apps should never be considered a substitute for counselling or other tailored medical help. If you have real concerns about a child's mental wellbeing, you should seek appropriate advice from a suitable source, such as their GP – or Childline, who can be contacted by calling 0800 1111.

ENCOURAGE OPEN COMMUNICATION

Mental health and wellbeing apps can be useful for writing down feelings, tracking your own health and other such activities. These can help if the problem is short-term and temporary – such as a child getting stressed about approaching exams – or if you're currently waiting for professional support. Nonetheless, it is important that children aren't solely reliant on the app and have a safe space to talk about their feelings and experiences in the real world.

Meet Our Expert

Dr Claire Sutherland is an online safety consultant, educator and researcher who has developed and implemented anti-bullying and cyber safety policies for schools. She has written various academic papers and carried out research for the Australian government comparing internet use and sexting behaviour of young people in the UK, USA and Australia.

10 Top Tips for Parents and Educators

SAFETY OVER THE FESTIVE SEASON

The holiday season, marked by Christmas and New Year, brings joy and togetherness but also presents unique safety challenges for children, families and educators. From busy holiday shopping, traveling and family gatherings to managing digital activity during school breaks, staying safe during this period requires heightened awareness. This guide offers practical tips to help families and educators maintain a more secure and fulfilling festive period.

1 MONITOR DIGITAL ACTIVITY

Children spend more time online during school holidays, increasing exposure to potential dangers such as cyberbullying, inappropriate content and online predators. Balancing screen time, avoiding harmful websites and ensuring children engage positively online can be difficult without proper monitoring tools. Set clear boundaries, encourage open discussions about online safety and use parental controls to manage content exposure and screen time effectively. Regular check-ins and positive reinforcement around digital habits encourage safe online behaviour.

2 PRACTICE FIRE SAFETY PROTOCOLS

The incidence of house fires increases during Christmas due to greater use of candles, cookers and electrical decorations. Open flames, electrical overloads and the need for quick response plans can make fire safety challenging. Ensure smoke detectors are operational, keep fire extinguishers on hand and teach children how to respond in case of a fire emergency. Avoid leaving cooking unattended and use fire-safe candles to prevent mishaps.

3 CREATE TRAVEL SAFETY PLANS

More families tend to travel during the holidays, resulting in busier roads, increased traffic accidents and weather-related hazards. Weather conditions, road rage, fatigue and busy airports can all compromise travel safety. Pack emergency kits and adhere to seatbelt laws. Plan routes in advance and allow extra travel time to avoid rushing and mitigate risks on busy roads.

4 BEWARE OF ALLERGIES

Holiday meals often involve many foods that may contain allergens. Cross contamination, unclear labelling and lack of allergy-friendly options can lead to severe reactions. Communicate any allergy needs to hosts, provide safe food alternatives and carry necessary medications like antihistamines or EpiPens. Teaching children how to advocate for themselves and recognise dangerous foods also contributes to safer celebrations.

5 PREVENT THE SPREAD OF ILLNESS

Cold weather and seasonal socialising can increase the spread of viruses like flu and COVID-19. Crowded gatherings, schools out of session and frequent travel can lead to higher infection risks. Emphasise hygiene, encourage vaccination, disinfect surfaces and isolate symptomatic individuals. Communication with children about proper hygiene practices is essential to reduce the spread of illness.

6 STAY VIGILANT ON THE ROAD

Increased holiday traffic heightens the risk of accidents for both drivers and pedestrians. Distracted driving, pedestrian safety and inclement weather can complicate road safety. Encourage pedestrian safety practices, avoid distracted driving and never drive under the influence.

7 MAINTAIN SAFE DECORATIONS

Festive decorations such as Christmas lights and candles can pose electrical, fire and choking hazards if mishandled. Frayed wires, toppling Christmas trees, small ornaments and open flames can be difficult to control, especially in busy households with children. Inspect and maintain decorations, secure Christmas trees, place fragile or small items out of reach and ensure candles are never left unattended. Testing smoke alarms and using flame-retardant decorations can significantly reduce risks.

8 SET BOUNDARIES FOR GIFTS

Some toys and gadgets can present choking, sharp-edge or safety risks, particularly for young children. Ensuring that gifts meet safety standards and are age appropriate can be complex with so many options available. Inspect all toys carefully and ensure any tech devices have parental controls. Setting expectations around safe gift use and discarding packaging that poses a risk also helps to prevent accidents.

9 ADDRESS STRESS & FATIGUE

Holiday pressures can lead to burnout, which affects both physical and mental health. Overpacked schedules and a lack of downtime can cause stress and fatigue, leading to accidents or poor decision making. Incorporate rest, maintain regular routines and seek support to reduce stress. Encourage activities that promote relaxation to create a healthier, happier holiday experience for everyone.

10 DRINK RESPONSIBLY

Alcohol is commonly present at holiday events, raising concerns about safety and supervision. Excessive alcohol consumption can lead to accidents, impaired judgment and lack of supervision for children. Designate responsible adults, limit consumption and provide transportation alternatives for guests. Teaching moderation and modelling responsible behaviour in front of children ensures that celebrations remain positive and secure.
