

North Crescent Primary School

Guiding Explorers of the Future

A message from Mrs Quick - Squid Games: What Parents Need to Know

It is about a world where contestants, who are deeply in debt, compete to win innocent-looking children's playground games in order to win cash prizes, however are then killed if they do not succeed at the tasks. The show features high levels of extreme violence, sexual content and threats of sexual violence, as well as a strong theme of gambling that runs throughout the whole show.

The game may be interpreted as a programme aimed at children rather than adults BUT comes with a UK age rating of 15+. Our primary school children should not be exposed to this. If your child is playing this game this is a safeguarding concern.

Please help us by working together to help safeguard our children.

Diary Dates

Monday 10th February -
Parent Drop-Ins @ 3:30 pm

Thursday 13th March -
Year 4 Sharing Assembly @ 2:50pm

Monday 17th March -
Parent Consultations

Thursday 20th March -
Parent Consultations

Thursday 27th March -
Year 5 Sharing Assembly @ 2:50pm

Book of the Week

Tomas has a secret - a big secret.

He has his own tiny dragon named Flicker, a dragon which grew on a very special tree at the bottom of his grandad's garden. Not only that - his friends Ted, Kai and Kat have dragons too, all grown on the same dragon-fruit tree!

Having your own dragon is magical - but Tomas is also about to find out what living with a dragon is REALLY like. When the fire-breathing kicks in and you get singed every five seconds, it's like having an unpredictable volcano in your pocket.

'The Boy who Lived with Dragons'
by Andy Shepherd

Huge congratulations to the following children who have been chosen as the Lead Learners.

Pathfinders 1	Taliah	Pathfinders 2	Teigan
Adventurers 3	Harmony-Rose	Adventurers 4	Aria-Jane
Navigators 5	Cayden	Navigators 6	Harry

Each week we celebrate the class that have shown respect for their classroom. The children really love our gold, diamante dustpan and brush award! Why don't you ask them about it?

A massive well done to our chosen cross country representatives who have been practising in this unpredictable weather ready for the cross country competition on Thursday. They have shown amazing resilience and the whole school will be wishing them good luck as they represent the school. Well done and, regardless of the result, we are so proud of you all. Go team!

What Parents & Educators Need to Know about JUSTALK KIDS

WHAT ARE THE RISKS?

JusTalk Kids is a child's version of the JusTalk app – a highly popular social networking platform – designed for users up to 13 years of age, allowing them to video call, message and participate in group chats. While adults can link their own JusTalk account to their child's and make use of parental controls, it's important to understand the risks associated with the app.

SUBSCRIPTION FOR PREMIUM ACCESS

While JusTalk Kids is free, there's the option to subscribe to a kids' premium account or a premium family account. At a cost, this feature allows children to have access to more fun features such as games they can play with others in a call; exclusive stickers; a badge denoting them as a premium subscriber; and exclusive ringtones and themes.

RESISTANCE TO CONTROLS

JusTalk Kids endeavours to allow children the sense of having a chat-based app while allowing parents to set controls (within the app or from their own adult JusTalk account). The basis behind this is positive; however, some children are challenging their parents by refusing to use JusTalk Kids, preferring to use the adult version without any restrictions in place.

KNOWING THE PARENT PASSCODE

After downloading JusTalk Kids, parents can set a passcode which users must enter to add contacts. The parental controls help to manage which content can be viewed and who children can add as a contact: this then allows children to chat with friends in a controlled environment. However, prospective contacts don't have to know a specific username. In theory, someone could type in a random name and then add them as a friend.

POTENTIAL DATA LEAKS

JusTalk and JusTalk Kids claim to be secure and encrypted, going so far as to state that even the developers themselves won't access your data. However, a security lapse in 2022 highlighted that messages were not in fact encrypted – leading to concerns around the security of the app and the transparency of the development team.

CYBERBULLYING

Online chats can provide a sense of anonymity, leading some users to post things which they wouldn't normally say in person. Combined with the option of group chats, there's a risk that young people might join in with this kind of behaviour, escalating it further and potentially turning what should be a fun experience into something deeply negative.

TOO MUCH SCREEN TIME

A report by the UK Parliament Education Committee highlighted a 52% increase in children's screen time between 2020 and 2022 – as well as finding that 25% of children used their smartphones in a manner consistent with screen addiction. Introducing children to social networking apps when they're too young can lead to bad digital habits and a reliance on technology from an early age.

Advice for Parents & Educators

JUSTIFY THE CONTROLS

If parents allow their child to use JusTalk Kids, they should explain that they're putting parental controls in place to make the app safer. Make sure the child knows not to put their full name on the account and doesn't use a photo of themselves as their profile picture. This type of open discussion will help to ensure that a child is aware of the app's potential risks and knows how to reduce them.

TALK ABOUT ONLINE FRIENDSHIPS

Young children could be excited to use this app. However, highlight that they must do so in a positive, respectful and responsible manner. While it can be easy to get caught up in a group chat, it's important to talk to others politely and call out any unpleasant behaviour. Discuss the importance of limiting their contacts to people they know in real life and use parental controls to enforce this.

DOS AND DON'TS OF SHARING

Some children might not understand the potential dangers of oversharing online. Set clear guidelines around what *is* and *isn't* safe to share on the internet, and discuss the concept of a digital footprint. Children need to understand that the things they say and share online can never be completely erased. Even if they delete it themselves, it can be saved and distributed by others.

ENCOURAGE OPEN COMMUNICATION

Apps like JusTalk can sometimes lend themselves to bullying behaviours. Parents should monitor what their child is sending and receiving, check in with them regularly and encourage them to share their feelings (both positive and negative) at home. Remind them that they can block a contact if someone is treating them disrespectfully.

Meet Our Expert

Dr Claire Sutherland is an online safety consultant, educator and researcher who has developed and implemented anti-bullying and cyber safety policies for schools. She has written various academic papers and carried out research for the Australian government comparing internet use and sexting behaviour of young people in the UK, USA and Australia.

What Parents & Educators Need to Know about

TIKTOK

AGE RESTRICTION
13+

(Certain features are restricted to over-18s only)

WHAT ARE THE RISKS?

Adults tend to associate online videos with YouTube – but among teens, TikTok is king. The app provides a stream of short clips tailored to users' interests, based on what they've already watched. Around half of British children use TikTok, and while much of the content is benign, Ofcom considers it the app where youngsters "were most likely to encounter a potential harm".

AGE-INAPPROPRIATE CONTENT

While TikTok's Following feed only displays videos from familiar creators, For You is a collection based on a user's previously watched clips. Most of these videos will probably be inoffensive, but the app could potentially show something unsuitable. If children then engage with this content, more like it will follow. TikTok's guidelines prohibit the sharing of illegal or inappropriate content, but the huge number of uploads means that a small amount inevitably slips through.

BODY IMAGE AND DANGEROUS CHALLENGES

According to Ofcom, most online harms for teens are body image related for girls (promoting unhealthy eating, body shaming and so on) and dangerous stunts for boys. Both are prevalent on TikTok. One extreme example of the latter was the 'blackout' trend, which encouraged users to hold their breath until they passed out from a lack of oxygen. This led to two families filing lawsuits against TikTok over the tragic deaths of their children.

IN-APP SPENDING

TikTok is free, but users have the option to buy TikTok coins, which can be used to purchase gifts for content creators. Coin bundles range from £9.99 to an eye-watering £99; while that may not sound appealing, the app still generated £7.9 billion in user spending in 2023. TikTok's policy is that under-18s can't make in-app purchases, but it's possible to bypass this with a fake birth date.

CONTACT WITH STRANGERS

With more than 1.5 billion users globally, the potential for contact from strangers on TikTok is high – especially as accounts created by over-16s (or young people using a fake date of birth) are set to public by default. This means that not only is someone's profile visible to everyone else on the app, it also suggests their videos to others and enables anyone to download or comment on them.

MISINFORMATION AND RADICALISATION

Although the short videos on TikTok tend to be more frivolous than the longer ones on YouTube, clips can still influence impressionable minds in a negative way. Not only is there plenty of dangerous misinformation on TikTok, but Ofcom reports that nearly a third of 12 to 15-year-olds use TikTok as a news source – so you should be wary of misogynistic, racist or conspiracy-themed material shaping how they see the world.

ADDICTIVE DESIGN

With its constant stream of eye-catching videos, TikTok can be addictive to young brains. In 2024, UK children spent an average of 127 minutes per day on the app: that's twice as much as in 2020. Excessive use can interfere with young people's sleep patterns – often leading to irritability – and distract them from other, healthier activities. The instantly skippable nature of bite-size videos may also impact children's ability to maintain focus.

Advice for Parents & Educators

ENABLE FAMILY PAIRING

Family Pairing allows parents to link their TikTok account to their child's, and control settings remotely. Parents can then turn on Restricted Mode (reducing the chances of a child seeing inappropriate content), set screen-time limits, make accounts private and manage whether their child can send messages – and if they can, to whom. Children can't alter these settings without parental approval.

DISCUSS THE DANGERS

If a child wants to use TikTok and you're happy for them to do so, it's good practice to discuss the potential risks. Ensure that they don't share any identifying personal information, and that they know to talk to a trusted adult if they're worried by interactions on the app. With more teens using TikTok for news, it's also worth talking about misinformation and propaganda, and how to identify it.

Meet Our Expert

Alan Martin is an experienced technology journalist who has written for the likes of Wired, TechRadar, Tom's Guide, The Evening Standard and The New Statesman.

BLOCK IN-APP SPENDING

If a child is using an iPhone or Android device to access TikTok, you can alter their settings to prevent them from making in-app purchases. We'd recommend enabling this feature, as it can be quite easy for a young person to spend a significant amount of real money buying TikTok coins to unlock more features of the app – sometimes without even realising.

READ THE SIGNS

If you're concerned that a child is spending too much time on TikTok, or that they've been emotionally affected by something they've seen, it's important to know how to spot the signs. Increased irritability and a lack of concentration are potential red flags, as is failing to complete homework or skipping meals. Remember, the parental controls are there for a reason, and it's never too late to introduce limits.
